BP20 IR Thermometer

The digital ear thermometer / baby thermometer provides accurate and rapid temperature readings from the ear over the range of 34 to 42.2°C.

The ear thermometer measures the infrared heat created by the eardrum and surrounding tissues, converting this temperature into an oral equivalent.

Each digital ear thermometer is supplied with 20 replaceable probe covers that help to avoid cross-contamination. The ear thermometer is powered by a CR2032 lithium coin cell battery.
