

Methylene Chloride

Applications

Foam blowing

MCL is used as an auxiliary foam blowing agent in the production of low-density and soft polyurethane foam.

Pharmaceutical solvent

MCL, a processing solvent, is used in a variety of pharmaceutical applications as a reaction medium, an extraction solvent, a carrier solvent and etc.

Metal Cleaning

MCL has the lowest boiling point of the solvents used in vapor degreasing and is used in cold cleaning formulations.

HFC-32

The primary application is HFC-32, which is used as a refrigerant.

Packaging

- 250kg Steel drum

Technical Information

Methylene Chloride (wt%)	99.9 min
Moisture (ppm)	100 max.
Nonvolatile Matter (wt ppm)	10 max.
Acidity (wt ppm, as HCl)	10 max.
