

WALL SCANNER BI15

Practical universal locating device for drilling and levelling assistance

PROMAT

TROTEC
AT WORK.

A FEW PRACTICAL BENEFITS:

Simple detection of live cables, wood or metal in walls and floor

Adjustable laser levelling aid

With integrated bulls eye level and spirit level for exact alignment

Adjusting wheels for evening out surfaces

Detection to a depth of 38mm

Audiovisual alarm upon detection of alternating current

Laser installation assistance up to 6 metres reach

Material calibration when switching on

Simple operation

Goodbye drilling damage — The BI15 wall scanner protects drills and saves nerves at the same time, as this multifunctional measuring device doesn't only locate ferrous and non-ferrous metals or live cables, but also reliably finds wooden substructures located below plasters or concrete.

The measuring device is fitted with an adjustable laser levelling assistance to show the further course for construction or piping. This laser levelling assistance, combined with the two built-in spirit levels can be used as installation tools for correct angular alignment.

So that the BI15 Wall Scanner can also be aligned for measuring on uneven surfaces, there are two independent adjustment wheels fitted to the back which can compensate for unevenness at the position of measuring.

Technical Data	BI15 Wall Scanner
Article Number	3.510.205.140
Maximum Detection Depth	Max. 38mm
Accuracy	12.7 mm at 6.1 m
Max. Range[m]	6.1 m
Laser class	2
Laser Rotation	180 °C in steps of 45°, laser wavelength: 630 - 670
Internal (battery)	1 x 9 V battery
Operation Temperature Range [°C]	-7 -49 °C
Storage Temperature Range [°C]	-29 - 66 °C
Dimensions	180 x 38 x 67
Weight [g]	180 g
